Health care services facilities for students, academics and administrative staffs' wellbeing

1. Beni-Suef University Hospitals

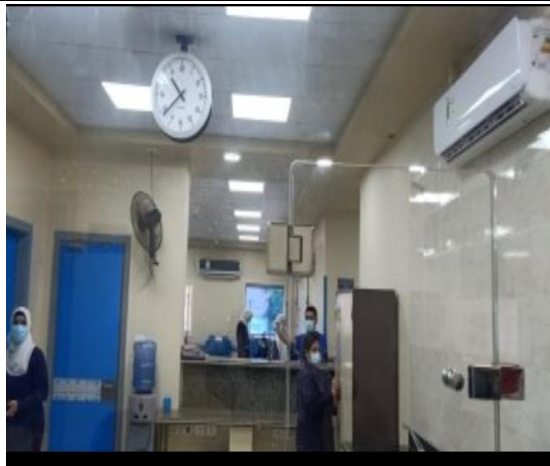

2. Dental Clinic for children with special needs

3. oxygen generating station

4. Building of outpatients clinics

5. Oncology and Burn Hospital

**Description:**

1- Beni-Suef University provides medical services from a wide range of medical sciences to students, university personnel and outsiders, including BSU hospitals at faculty of Medicine and at the new branch in 320 acres complex, outpatient clinics, the Oncology and Burn Hospital, Oral and Dental Clinic and Medical Technological Laboratories.

2- BSU hospitals complex involves the main building of the university hospital, outpatient clinics equipped with the latest clinic systems, the surgical and emergency care, kidney unit and the emergency operations unit. BSU hospitals complex have heart monitors, life-saving squeezing airbags, sputum suction machines and oxygen tanks, etc. First aid and emergency rooms are also available for emergencies.

3- The outpatient clinics are attended by about 800-1000 patients per day and they have been providing their services since April 1998 to patients in Beni-Suef Governorate in various specialties:

- a) General and private internal affairs (heart, chest, nerves, psychological, endemic, etc.).
- b) General surgery, orthopedics and urology.
- c) Eye, nose, ear and throat surgery
- d) Pediatrics, gynecology and obstetrics.
- e) This is in addition to other specialized clinics such as; Hematology Clinic, Chemotherapy Oncology Clinic.

4- Few months ago, the Oncology and Burn Hospital was opened and is the first of its kind in the governorate level and is a new addition to medical services within the university hospitals. It was built on an area of 800 square meters and was equipped with the latest capabilities.

5- Also, oxygen generating station was completed as part of the BSU plan to develop BSU hospitals to produce and provide medical oxygen helping to meet the needs of all hospitals and units affiliated with the university ensuring its continuity throughout the day as it depends on the surrounding air and not an external source.

This station is the first of its kind at the level of BSU hospitals in all universities of the Republic, and aims to achieve self-sufficiency.

6- Beni-Suef University hospital seeks to continuously improve the level of health services provided by the university hospital to keep pace with the national vision as follows:

- a) Developing the scientific and administrative skills of hospital administrators and administrative leaders
- b) Providing medical and administrative cadres and working on developing their capabilities by training inside and outside Egypt
- c) Providing the necessary financial support to supply the hospital with advanced equipment and systems to keep pace with global medical developments
- d) Expanding in the establishment of university hospital branches on the university campus, East of the Nile, to increase the number of beneficiaries.
- e) Establishing a branch of East Nile University Hospital to serve rare and vital specialties such as oncology, heart surgery, pediatrics and the central blood bank.
- f) Establishment of a scientific center affiliated to the University Hospital to monitor emerging and endemic diseases and epidemics
- g) Creation of an application form for medical consultations at the university hospital to serve patients.
- h) Creation of an application form to book medical statements for university employees at the University Medical Center
